

Have you received or sought organisational support after being involved in a clinical incident?

Were you a registered or enrolled nurse or a registered midwife in Australia at the time of the event?

Are you willing to share your experiences of organisational support following a clinical incident, adverse event or medical error? The incident can have occurred within any clinical setting and/or geographical location across Australia.

About the Study

This study will explore individual experiences of organisational support and will not investigate details of the incident itself. All data you provide will remain strictly confidential.

Participation

We warmly welcome participants from all cultural backgrounds, including Aboriginal and Torres Strait Islander peoples. Your experiences and perspectives are invaluable. We are committed to creating a culturally safe, respectful, and inclusive space where all voices are heard and valued.

Participation in this study is entirely voluntary, even if you are not in clinical practice anymore. Please do not participate in this study if the incident is undergoing legal proceedings or is under review by a healthcare organisation or disciplinary board.
