

Clinical Nurse Consultant - Continence

The role:

- This is an advanced clinical practice role with responsibility for coordinating the delivery of Continence Services across a broad community practice setting. The role will monitor the team's clinical load, allocate resources in accordance with clinical practice experience and service priorities and provide clinical expertise in the management of more complex cases.
- Support an integrated approach to service delivery by developing effective links with other public and community based health service providers and promote community awareness in relation to continence services.
- Work collaboratively with the Nurse Unit Manager in the evaluation, planning and development of continence services for the southern region of Tasmania and in the operational functioning of the service.

Note: - Please refer to the Statement of Duties for all the selection criteria of this position to address in your application.

Community Continence South:

- Is a dynamic specialist team that delivers care in clinics and homes across the picturesque Southern Region of Tasmania.
- The position of Clinical Nurse Consultant provides high level clinical support and leadership to a small team of dedicated and skilled clinicians.
- The occupant is encouraged and supported to develop and maintain a network of other clinical experts to assist in the consultancy role and to provide opportunities to contribute to community nursing and health care developments more broadly.
